918/539

On January 4, 2010, the Oklahoma Corporation Commission approved a plan to prevent so-called "number exhaust" in the region served by the **918 area code** while at the same time allowing current residents, businesses, schools and local governments to keep their existing numbers.

Called an "overlay," the plan will add another area code (**539**) to the entire existing 918 area code geographic area. There would be no change to existing numbers. Eventually, all new numbers in the area will get the new 539 area code and after a lengthy transition phase, all local calls would be 10 digits (the area code and the 7 digit number). There will be no change in local call boundaries, or to 9-1-1 or 2-1-1 services.

Schedule

- No change until August 7, 2010
- August 7, 2010 – "Permissive Calling Period" begins
 - Customers will be able to complete a call using 7 digits or 10 digits (area code plus number)
 - Runs for 7 months
- March 5, 2011 – "Permissive Calling Period" ends, 10 digit dialing will be required
- April 1, 2011 – New 539 area code numbers made available
 - Customers may still ask for and receive a 918 number if they are still available
- Fourth Quarter, 2012 – Predicted exhaust of 918 numbers
 - NOTE: This is an estimate, and subject to change

Affected counties include the following:

Adair, Cherokee, Craig, Creek, Delaware, Haskell, Hughes, Latimer, LeFlore, Lincoln, Mayes, McIntosh, Muskogee, Nowata, Okfuskee, Okmulgee, Osage, Ottawa, Pawnee, Payne, Pittsburg, Pushmataha, Rogers, Sequoyah, Tulsa, Wagoner, and Washington.

Frequently Asked Questions

Q: If all local calls require an area code, will there be long distance charges?

A: No. There will be no change in what is a local call, regardless of its area code. Please note that for all local calls, you will NOT need to dial "1" before the area code, and calls improperly dialed will be automatically blocked.

Q: How will I know whether to use 539 or 918 for a particular number?

A: Local telephone listings will include the area code. If you use the wrong area code on a local number, a recording will inform you.

Q: Will I be able to request a 918 number in the future?

A: Yes. However, whether your request can be granted depends on whether there are 918 numbers available at the time of your request.

Q: Why is this change necessary? Why are we running out of numbers?

A: In recent years a combination of new technologies and increased demand for regular telephones in homes and offices, cellular phones, pagers, fax machines, modems, burglar alarms, ATM machines, Internet access, and other uses have strained existing telephone number resources.

Q: How does a new area code affect other services?

A: 911, 411, and 211 services will NOT be affected. Calls will continue to be handled just as they are today.

Q: Who decides when the supply of numbers will exhaust? Who chooses the numbers for the new area code?

A: The numbers for the 539 area code, and for all area codes in the U.S., are chosen by the North American Numbering Plan Administration (NANPA), which also forecasts when the supply of numbers will exhaust.

This list of contacts at the State Department of Education (SDE) is arranged based on staff records as of August 8, 2010. Personnel at the coordinator level or above are listed; for sections in which there is only one person at this level, a support staff person is listed as an alternate contact. In most cases, individual phone numbers are the same as that given for the section to which the person is assigned. All State Department of Education staff e-mail addresses are in the format of <Firstname_Lastname@sde.state.ok.us>. For example, State Superintendent Sandy Garrett's e-mail address is <Sandy_Garrett@sde.state.ok.us>.
